Social Responsibility

Diogo Cardoso is aware that the responsible use of natural resources, environmental protection and respect for the communities within which it is present are essential requirements for a company that operates on a global level.

For this reason, Diogo Cardoso, which is always looking towards the future, has for some time been engaged in a worthwhile initiative for the development of projects that are aligned with the leading international principles concerning the combination of economic sustainability and environmental and social sustainability.

The aim is to identify and make available the creativity of the company's raw materials, technical solutions and increasingly advanced production processes which are, from the perspective of sustainability, more innovative and respectful of people and the environment. Working to ensure that the company achieves this goal means enabling it to face a future in which environmental and social sustainability will be increasingly important to the creation of value.

The thoughts of Diogo Cardoso on this matter are clear: "the environment issue involves everyone. It is up to us all to make the right choice to change the world we live in. We cannot let future generations be led by the wrong choices we have made in the past. We have to make the right decisions for a certain future".
